PROFESSIONAL SUMMARY

A full-stack software developer specializing in modern web technologies like React, Node.js, and TypeScript. Proven experience in building robust cross-platform applications and integrating advanced AI tools such as OpenAI CLIP and Gemini AI. A President's Lister with a Salesforce Virtual Internship background, dedicated to delivering scalable, data-driven software solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java

Markup & Styling: HTML, CSS, Tailwind CSS

Frameworks & Libraries: React.js, React Native, Node.js, Express.js

Databases & Backend: PostgreSQL, Prisma, Supabase, Firebase, REST APIs, JWT

Developer Tools: Git, GitHub, Postman, Visual Studio Code, Vercel

PROJECTS

FoundNest – Lost and Found Management System **July 2026**

Full-Stack Developer

- Developed a cross-platform Lost and Found system for web and mobile using React, React Native, Node.js, and PostgreSQL to streamline the item recovery process.
- Integrated OpenAI CLIP and Gemini AI to power automated image matching and assisted listings, allowing users to accurately log unknown items and receive instant match notifications.
- Implemented QR code smart tagging and RESTful APIs to accelerate item identification and ensure efficient, secure claim management.

ClinicMate – Clinic Management System **November 2025**

Full-Stack Developer

- Developed a responsive clinic management system using React.js and Tailwind CSS, centralizing patient records and reducing manual administrative tasks for clinic staff.
- Implemented Firebase-based data management and real-time updates, with a responsive Tailwind CSS interface for efficient clinic operations.

EDUCATION

Bachelor of Science in Information Technology **April 2027**

Bulacan State University - Main

- Major in Web & Mobile Application Development
- President’s Lister 2026
- Dean’s Lister 2025

EXPERIENCE

Salesforce Virtual Internship **October 2025 - December 2025**

- Completed a virtual internship focused on Salesforce ecosystem fundamentals, Trailhead learning, and hands-on project development.
- Earned a virtual internship completion certificate and developed practical skills relevant to Salesforce and cloud-based business solutions.

ADDITIONAL INFORMATION

- **Languages:** Filipino, English.
- **Certifications & Trainings:**
  - Information Technology Specialist in Python - Certiport (Pearson VUE)
  - Mastering Essential Tools for Modern Software Development
  - Cisco Network Addressing and Basic Troubleshooting
  - Top 6 Local AI Hackathon - AppBuilders
- **Organizations:** AWS Student Builder Group, BulSU Microsoft Student Community, Society for the Welfare of Information Technology Students
